ACCUMEN TECHNO MARKETING SOLUTION

COMPLETE TECHNICAL SALES TUTORIAL

From Beginner to Expert: Mastering Technical Sales in Engineering

- Indian Local Market
- Export & International
- FIDIC Contracts
- Railway Projects
- Industrial Filtration
- Lubrication Systems
- Facility Management

Version 2025

info.accumentechno@gmail.com www.accumentechno.com

For career guidance in Technical Sales — Freshers & Experienced Engineers Welcome

TABLE OF CONTENTS

Complete Technical Sales Tutorial — Accumen Techno

01	Introduction to Technical Sales	Pg 03
02	Understanding Technical Products & Applications	Pg 08
03	Lead Generation & Enquiry Management	Pg 15
04	Technical Specification & Drawing Reading	Pg 22
05	Costing, Pricing & Discount Strategies	Pg 30
06	Quotation Preparation & Documentation	Pg 38
07	Terms & Conditions — Indian & FIDIC Standards	Pg 45
08	Government vs Private vs Railway Contracts	Pg 52
09	Negotiation Skills & Objection Handling	Pg 58
10	Follow-Up Strategies	Pg 65
11	Order Processing & Project Coordination	Pg 72
12	After-Sales Service & Relationship Management	Pg 79
13	International Sales & Export Documentation	Pg 85
14	Industrial Sectors: Filtration, Lubrication, FM	Pg 92
15	Case Studies & Real-World Scenarios	Pg 98
16	Career Guidance & Mentorship	Pg 110

MODULE 1: INTRODUCTION TO TECHNICAL SALES

What is Technical Sales & Who is a Technical Sales Engineer?

Technical Sales = Engineering Knowledge + Sales Skills + Business Acumen

Aspect	General Sales	Technical Sales
Product	Everyday items	Complex engineering products
Knowledge	Basic	Deep technical understanding
Sales Cycle	Days	Weeks to months
Decision Makers	Individual	Multiple stakeholders
Value	Low-Medium	High to Very High
Customization	Standard	Often customized
Margin	Lower	Higher (15-25%)

KEY SKILLS OF A TECHNICAL SALES ENGINEER

Engineering Knowledge

Drawing reading, specs, manufacturing

Sales Skills

Communication, negotiation, closing

Business Acumen

Costing, margins, contracts

Industry Knowledge

Sectors, applications, standards

THE TECHNICAL SALES PROCESS FLOW

From Lead Generation to After-Sales — Complete Cycle

01 LEAD GENERATION → **02** ENQUIRY ANALYSIS → **03** TECHNICAL STUDY → **04** COSTING & PRICING → **05** QUOTATION PREPARATION

KEY INSIGHT FOR FRESHERS:

- Technical knowledge opens the door — relationships keep it open
- Average sales cycle in B2B engineering: 4–12 weeks. Patience is a skill.
- Government tenders: 8–12% margin | Private large: 12–18% | Private small: 18–25%
- Always document everything — verbal commitments are dangerous in engineering contracts
- Your company: Accumen Techno specializes in industrial ducting, filtration, lubrication, railway, and facility management projects

MODULE 2: PRODUCT KNOWLEDGE FRAMEWORK

Industrial Products — MS Ducts, Filters, Lubricators, Railway Components & FM Systems

WHAT is it?

Name, category, basic function
Ex: MS Fabricated Duct — air/gas conveyance system

HOW it works?

Operating principle
Ex: Pressure differential created by fans/blowers

WHAT is it made of?

Material, grade, thickness
Ex: IS 2062 Grade A, 3mm MS, epoxy paint

WHERE is it used?

Industry, location, environment
Ex: Cement, steel, power, railways, pharma

WHY this product?

Advantages over alternatives
Ex: Cost-effective vs SS, easier fabrication than CI

HOW to select?

Sizing, specs, flow rate, pressure
Ex: Velocity method, pressure loss calculation

HOW to install?

Site survey, support structure, alignment
Ex: Flanged joints, gasket type, bolt torque

HOW to maintain?

Inspection, service intervals, spares
Ex: Annual inspection, painting cycle, flange check

INDUSTRY APPLICATIONS MATRIX

Key Sectors Where Accumen Techno Operates — Local & Export

Industry Sector	Products/Systems	Key Considerations	Business Value
Cement Plants	Ducts, Hoppers, Cyclones, Chutes	Abrasion resistance, thick material (5-6mm), dust handling	HIGH
Steel & Power	Ducts, Chimneys, Expansion Joints	High temp, expansion joints, large dia (1200mm+)	HIGH
Railways (IR/Metro)	Ducting, HVAC, Cable Trays, Fire Dampers	RailTel spec, RDSO approval, GCC contract	VERY HIGH
Filtration Systems	Bag Filters, Cartridge Filters, Scrubbers	Pulse jet cleaning, ΔP monitoring, filter media selection	HIGH
Lubrication Systems	Centralized lubrication, grease systems	Oil viscosity, bearing life, maintenance intervals	MEDIUM
Facility Management	HVAC, Fire Fighting, Plumbing, Electrical	AMC contracts, PPM schedules, SLA management	HIGH
Chemical/Pharma	SS Ducts, Lined Pipes, Scrubbers	Corrosion resistance, cGMP compliance, polished finish	HIGH
Food & Agri	SS/GI Ducts, Hygienic Fittings	Sanitary design, easy cleaning, no rust	MEDIUM
International Export	All above + special crating/documentation	FOB/CIF pricing, LC payment, certificate of origin	VERY HIGH

MODULE 3: LEAD GENERATION & ENQUIRY MANAGEMENT

Sources, Qualification, BANT Framework & Lead Scoring

LEAD SOURCES

INBOUND	Website, phone, email, referrals, walk-ins
OUTBOUND	Cold calls, LinkedIn, trade shows, industrial visits
STRATEGIC	Tender portals (GeM, CPPP), EPC contractors, consultants
DIGITAL	IndiaMART, TradeIndia, Google Ads, YouTube channel

BANT QUALIFICATION FRAMEWORK

B - BUDGET	'What is the budget range?' / 'Have funds been approved?'
A - AUTHORITY	'Who is the final decision maker?' / 'Who signs the PO?'
N - NEED	'What specific problem are you solving?' / 'Why now?'
T - TIMELINE	'When do you need delivery?' / 'Is there a penalty clause?'

LEAD SCORING MATRIX

80-100 HOT LEAD	Immediate quote + daily follow-up
60-79 WARM LEAD	Quote in 2-3 days, weekly follow-up
40-59 COLD LEAD	Basic info, nurture over 30 days
<40 NOT QUALIFIED	Archive, no action now

⚠ *Client names in all case studies are anonymized for tutorial purposes. Contact info.accumentechno@gmail.com for real case study mentorship.*

MODULE 5: COSTING, PRICING & DISCOUNT STRATEGIES

Complete Cost Sheet, Margin Calculation & Discount Management

COST COMPONENTS

A — MATERIAL COST

Raw material + wastage (8-12%) + cutting charges
Ex: MS 3mm plate @ ₹65/kg, Wastage @10%

B — LABOUR COST

Fabrication + erection + supervision
Ex: Fabrication ₹350/hr, Erection ₹800/man-day

C — EQUIPMENT COST

Crane/hydra, welding machine, scaffolding
Ex: Hydra ₹5,000/day, Welding machine ₹500/day

D — TRANSPORT

Truck hire + loading/unloading + insurance
Ex: 10T truck ₹8,000-15,000 depending on distance

E — OVERHEADS

Shop overhead 5% + Admin 3% + Contingency 2%

F — PROFIT MARGIN

Private: 15-25% | Govt: 8-12% | Export: 20-30%

SELLING PRICE = Material + Labour + Equipment + Transport + Overheads + Profit Margin

SAMPLE COST SHEET (Anonymous Client — Industrial Duct Project)

Item	Amount (₹)
Material Cost (MS Plates, Consumables)	3,64,912
Labour — Fabrication	50,000
Labour — Erection	65,750
Equipment (Crane, Scaffolding)	8,400
Transport (Extra at Actual)	—
Shop Overhead @ 5%	21,533
Admin Overhead @ 3%	12,920
Contingency @ 2%	8,613
Sub-Total (Cost)	**5,31,128**
Profit Margin @ 15%	**79,669**
Quote Value (Excl. GST)	**6,10,797**
GST @ 18%	**1,09,943**
GRAND TOTAL	**7,20,740**

💡 *DISCOUNT STRATEGY: Max 5% as 'special client discount' — always justify with reduced scope or volume. Never give discount without trade-off (larger advance, faster decision, volume commitment).*

PRICING STRATEGIES & DISCOUNT MANAGEMENT

5 Pricing Strategies + Discount Tactics for Indian Market

1. COST-PLUS

Selling Price = Total Cost + Margin%

Safe for new projects. Use for standard work. Margin 15-20%.

✓Safe ✓Predictable ✗May lose tenders

2. MARKET-BASED

Selling Price = Competitor Price ± Adjustment

Study competitors on IndiaMART, GeM. Match or beat.

✓Competitive ✗Squeezes margin

3. VALUE-BASED

Price = Value Perceived by Customer

When you offer unique quality, faster delivery, warranty.

✓Best margin ✗Hard to justify

4. PENETRATION

Price below market to gain entry

For new clients, new sectors. Build base, raise later.

✓Entry strategy ✗Low initial profit

5. TENDER/L1

Cost + minimum margin, win at L1

For Govt/Railway tenders. Recover from future orders.

✓Wins contract ✗Very thin margin

GOLDEN DISCOUNT RULE: Never give discount without getting something in return — more advance, faster PO, volume commitment, or reduced scope. Max standard discount: 5%

MODULE 7: TERMS & CONDITIONS — INDIAN & FIDIC STANDARDS

Standard T&C, Force Majeure, FIDIC Red/Yellow/Silver Book Basics

STANDARD T&C (Indian B2B Contracts)

DELIVERY

3-4 weeks from advance + approved drawing. Subject to Force Majeure.

PAYMENT

50% advance + 30% against delivery + 20% on completion. LC for exports.

FORCE MAJEURE

Floods, earthquakes, strikes, govt. orders, pandemic — no penalty.

GST

At applicable rate at time of dispatch. Current: 18% on supply + erection.

WARRANTY

6-12 months against manufacturing defects from date of delivery.

VALIDITY

30 days from quote date. Price subject to revision after validity.

LIQUIDATED DAMAGES

Max 0.5% per week, ceiling 5% of contract value (negotiate hard).

DISPUTE

Arbitration under Indian Arbitration Act, 1996. Jurisdiction: [Your city].

FIDIC CONTRACTS — BASICS FOR TECHNICAL SALES

RED BOOK FIDIC 1999/2017	Construction for Civil & Building Works. Employer-designed. Lump sum or re-measure. Common in Indian infrastructure & govt projects.
YELLOW BOOK Plant & D&B	Contractor designs & builds. Milestone payments. Common in EPC/turnkey industrial projects (filtration, power plants).
SILVER BOOK EPC/Turnkey	Fixed price, fixed time. Full contractor risk. Used in large industrial & international projects. Maximum risk for contractor.
MDB PINK BOOK Harmonised	MDB-funded projects (World Bank, ADB). Similar to Red Book with MDB amendments.

💡 *KEY: In FIDIC contracts, always check: Defects Liability Period (DLP), Retention Money %, Performance Security amount, and Dispute Board provisions before signing.*

MODULE 8: GOVERNMENT vs PRIVATE vs RAILWAY CONTRACTS

Procurement Systems, Tender Process, GeM, IREPS & GCC

Parameter	Private Sector	Govt/PSU Sector	Indian Railways
Decision Speed	Days to weeks	Months (bureaucratic)	Very slow (6-18 months)
Procurement	Direct PO / NIT	Tender (L1 system)	IREPS / GeM / Open Tender
Contract Type	WO / Agreement	NIT/Tender/CPWD	GCC (General Conditions)
Price Negotiation	Flexible	Rigid (L1 wins)	L1, no negotiation
Payment Terms	Negotiable	45-90 days	45-90 days after certification
EMD Required	Rarely	Always (1-2%)	Always (2% of tender value)
Performance BG	Sometimes	5-10% of order	5% via bank guarantee
Documentation	Moderate	Extensive	Very extensive (RDSO specs)
Margin Range	15-25%	8-12%	6-10%
Repeat Orders	Relationship-based	New tender each time	New tender / rate contract
Blacklisting Risk	Low	High	Very high (debarment)
Special Approval	None	Sometimes	RDSO/Metro Rail approval needed

GeM: Government e-Marketplace (gem.gov.in) | IREPS: Indian Railway E-Procurement System | GCC: General Conditions of Contract (Railways)

MODULE 9: NEGOTIATION SKILLS & OBJECTION HANDLING

Real Responses for Common Objections in Indian Engineering Sales

COMMON OBJECTIONS & WINNING RESPONSES

❝ Your price is too high	Explain scope: 'Sir, our price includes 3mm MS (not 2.5mm), all flanges, asbestos gaskets, installation + hydra. If I remove installation and use 2.5mm, I can match competitor at ₹4.25L. Shall I requote that scope?'
❝ Competitor quoted 15% lower	Compare scope: 'Can I see their quote? Usually difference is: thinner material, excluding flanges, no installation. Apples-to-apples, we're only 4% higher — and you get single-point responsibility + warranty.'
❝ We need 30 days credit	Trade-off: 'We can consider it. Option 1: 30-40-30 structure with interest. Option 2: Full advance with 2% discount. Option 3: LC from your bank. Which works?'
❝ Delivery is too long	Solve it: 'Standard is 4 weeks for quality. For 3 weeks: overtime charges ₹15,000 extra, or partial delivery — essential items first in 2 weeks, balance in 4 weeks. What's your hard deadline?'
❝ We already have a vendor	Differentiate: 'I understand. May I ask — are you 100% satisfied with their quality, delivery, and service? We handle [specific sector] projects and would love to be a backup vendor. No commitment needed — just a comparison quote?'
❝ We'll decide later	Create urgency: 'Quote valid 30 days. Steel prices rising (₹65→₹72/kg expected next month). If we confirm now, I can lock today's material rate and schedule your slot in production.'

NEGOTIATION TACTICS: The Flinch | The Trade-Off | Split Difference | The Nibble | Walk Away

MODULE 10: FOLLOW-UP STRATEGIES

30-Day Follow-Up Framework + Email & Phone Scripts

30-DAY FOLLOW-UP SCHEDULE

Day	Action	Script / Purpose
Day 0	**Send Quotation**	Initial submission via email + WhatsApp. Confirm receipt.
Day 1	**Thank You Call**	'Did you receive our quote? Any initial questions?'
Day 4-5	**First Follow-Up**	'Did you get a chance to review? Any queries on specs or price?'
Day 8-10	**Value Add**	Send reference projects, client testimonials, past work photos.
Day 15	**Progress Check**	'Any concerns? Would you like a site visit or technical meeting?'
Day 20	**Validity Reminder**	'Quote expires in 10 days. Steel prices may rise next month.'
Day 25	**Final Push**	'Last follow-up before validity expires. Shall we extend or close?'
Day 30	**Close or Extend**	Either get PO, extend quote, or archive and stay in touch.

GOLDEN FOLLOW-UP RULES:

1. Always follow up at the promised time 2. Keep records in CRM/Excel 3. Never follow up more than once per day 4. If client says 'not now' — ask 'when should I call back?' 5. Losing a quote gracefully = future business

MODULE 13: INTERNATIONAL SALES & EXPORT DOCUMENTATION

Incoterms, LC, Export Pricing & Documentation for Indian Exporters

INCOTERMS 2020 — QUICK REFERENCE

EXW — **Ex Works**
Seller packs at factory. Buyer does everything else. Lowest risk for seller.

FOB — **Free On Board**
Seller loads at Indian port. Buyer arranges ship + insurance.

CIF — **Cost Insurance Freight**
Seller pays freight + insurance to destination port. Most common for Indian exports.

CFR — **Cost & Freight**
Like CIF but buyer arranges own insurance.

DAP — **Delivered at Place**
Seller delivers to buyer's named destination — not unloaded.

DDP — **Delivered Duty Paid**
Seller handles everything including import duty. Maximum risk for seller.

EXPORT PRICING WORKSHEET (Anonymous Project)

Component	Amount
Ex-Works Cost (India)	₹ 49,475
+ Export Packing	₹ 5,000
+ Inland Transport to Port	₹ 3,000
= FOB Price	₹ 57,475
+ Ocean Freight (estimate)	₹ 15,000
+ Insurance (1.1% CIF)	₹ 800
= CIF Price (Destination)	**₹ 73,275**
Exchange Rate (USD=₹83)	**$ 882**
Profit Margin Added (20%)	**$ 1,058**
FINAL QUOTE TO BUYER	**$ 1,058**

LETTER OF CREDIT (LC) TYPES

Sight LC:	Payment on document presentation (best)
Usance LC:	Payment after 30/60/90 days
Confirmed LC:	Confirmed by Indian bank (safest)
Revocable LC:	Can be cancelled — AVOID

Documents needed: Commercial Invoice, Packing List, BL/AWB, Certificate of Origin, Inspection Certificate, Insurance Certificate, Fumigation Certificate (wooden packing)

MODULE 14: SPECIALIZED INDUSTRIAL SECTORS

Filtration, Lubrication, Facility Management & Railway Systems

INDUSTRIAL FILTRATION SYSTEMS

- Bag Filters, Cartridge Filters, HEPA Filters, Wet Scrubbers, ESP
- Key specs: Air volume (m^3/hr), ΔP (pressure drop), filtration efficiency (99.9%)
- Filter media: polyester felt, PTFE membrane, fiberglass
- Sales approach: Present ROI — clean air = less equipment wear + compliance
- Key clients: Cement, pharmaceuticals, food processing, metal foundries
- Approvals needed: CPCB emission norms, factory inspector clearance

CENTRALIZED LUBRICATION SYSTEMS

- Single-line, dual-line, progressive, circulating oil systems
- Components: pump, distributor, metering unit, hydraulic hose, reservoir
- Application: Steel plants, paper mills, mining, automotive assembly
- Key selling point: Reduces bearing failures by 60-80%, saves downtime cost
- Brands: SKF, Lincoln, Graco, Bijur Delimon — comparison helps during sales
- Tender approach: AMC (Annual Maintenance Contract) for recurring revenue

FACILITY MANAGEMENT SERVICES

- Hard services: HVAC, plumbing, electrical, civil, fire fighting systems
- Soft services: Housekeeping, security, pest control, landscaping
- SLA management: Response time KPIs, uptime guarantees, monthly reports
- Contract types: PPM (Planned Preventive Maintenance), reactive, integrated FM
- Revenue model: Monthly fixed AMC + variable job charges + spare parts
- Growth area: Smart building systems, IoT-based monitoring

RAILWAY PROJECTS (Indian Railways)

- Approval prerequisite: RDSO (Research Design Standards Organization) vendor approval
- Procurement: IREPS (ireps.indianrailways.gov.in) — mandatory digital tendering
- Contract: GCC (General Conditions of Contract) governs all IR contracts
- Key zones: Northern, Southern, Western, Central, Eastern + Metro Rail Corps
- Products: Ventilation ducts for coaches, HVAC for stations, fire dampers
- Special: Jamnalal Bajaj Award for SMEs — apply for recognition + visibility

MODULE 15: CASE STUDIES — REAL SCENARIOS (Anonymized)

Lessons from the Field — All Client Names Anonymized for Learning

CASE 1: THE PRICE OBJECTION

SCENARIO:

Client: Anonymous Metal Recycling Co., North India. Quote: ₹5.08L. Competitor: ₹4.25L (15% lower).

WHAT HAPPENED:

Investigation revealed competitor used 2.5mm material (not 3mm), excluded flanges (₹15K) and installation (₹30K). True difference only 4.4%. Order won by showing scope comparison — not by reducing price.

💡 **TAKEAWAY:**

Always compare apples-to-apples. Break down the competitor gap before touching your own margin.

CASE 2: URGENT DELIVERY

SCENARIO:

Anonymous Steel Plant, East India. Need delivery in 15 days vs standard 28 days.

WHAT HAPPENED:

Offered 3 options: (a) Partial delivery in 15 days, balance at 28 days (b) Overtime @₹25K extra for 15-day full delivery (c) Simplified standard sections first. Client chose option (b) — paid premium.

💡 **TAKEAWAY:**

Never say 'impossible'. Offer options with trade-offs. Urgency = premium pricing opportunity.

CASE 3: PAYMENT DELAY (90 DAYS OVERDUE)

SCENARIO:

Anonymous Industrial Client. Final payment ₹1L overdue by 90 days despite installation completion.

WHAT HAPPENED:

Systematic follow-up: Week 1 (invoice), Week 2 (call — will process), Week 3 (call — accounts processing), Week 4 (email escalation), Week 5 (final notice with legal reference). Payment received in Week 6.

💡 **TAKEAWAY:**

Document everything. Escalate professionally. Reference contract terms. Don't threaten — state consequences.

CASE 4: RAILWAY TENDER WIN

SCENARIO:

Anonymous Metro Rail project, Western India. Tender value ₹45L. 8 bidders.

WHAT HAPPENED:

Won by: (a) Getting RDSO approval 6 months in advance (b) Correct EMD submission (c) Competitive L1 pricing at 7.5% margin (d) Strong technical compliance with all specs (e) Clean track record.

💡 **TAKEAWAY:**

Railway tenders need advance preparation. RDSO approval is non-negotiable. Win on compliance, not just price.

Accumen

WHO IS THIS FOR?

CAREER GUIDANCE & MENTORSHIP

by ACCUMEN TECHNO MARKETING SOLUTION

- ✦ Fresh engineering graduates entering technical sales / B2B sales
- ✦ Sales executives wanting to move into techno-commercial roles
- ✦ Engineers with field experience but no formal sales training
- ✦ Those targeting government tenders, railway projects, or export markets
- ✦ Professionals in ducting, filtration, lubrication, or facility management

WHAT WE OFFER:

- ▶ 1-on-1 Mentorship
- ▶ Live Project Exposure
- ▶ Quotation Training
- ▶ Tender Filing Help
- ▶ Drawing Reading
- ▶ Negotiation Coaching
- ▶ Career Roadmap
- ▶ Industry Connects

CONNECT WITH US FOR MENTORSHIP

Write to us: info.accumentechno@gmail.com

Visit: www.accumentechno.com

Mention 'Technical Sales Tutorial' in your email subject | Individual mentorship sessions available

YOUR CAREER ROADMAP IN TECHNICAL SALES

Growth Path — From Fresher to Business Head in Industrial Sales

FRESHER / TRAINEE

0-6 Months

- Learn product knowledge
- Shadow senior sales engineers
- Read drawings with help
- Assist in site visits
- Learn quotation format

₹2-3.5L p.a.

JUNIOR TSE

6-18 Months

- Handle small enquiries independently
- Prepare basic quotations
- Do follow-up calls
- Attend meetings with senior
- Learn costing basics

₹3.5-5L p.a.

TECHNICAL SALES ENGINEER

1.5-3 Years

- Independent lead-to-order cycle
- Full quotation & negotiation
- Handle government tenders
- Site surveys & measurement
- Build client relationships

₹5-9L p.a.

SENIOR TSE / AM

3-6 Years

- Manage key accounts
- Handle large tenders (₹50L+)
- Build & mentor team
- Export enquiries & LC
- FIDIC contract knowledge

₹9-16L p.a.

SALES MANAGER / BH

6+ Years

- P&L responsibility
- Team of 5-10 engineers
- Strategic partnerships
- International markets
- Board-level presentations

₹16-30L+ p.a.

Salaries are indicative for Indian market 2025. Actual may vary by company, city, and industry sector. Mentor guidance: info.accumentechno@gmail.com

MODULE 6: PROFESSIONAL QUOTATION STRUCTURE

Step-by-Step Quotation Template — Accumen Techno Format

QUOTATION STRUCTURE

1. LETTERHEAD	Company name, logo, GST No., MSME No., ISO cert, address, website
2. REFERENCE & DATE	Quote No., Date. Ex: ATMS/IND/QB-1002/2025
3. CLIENT DETAILS	To, Kind Attn:, Subject:, Ref: (their enquiry number)
4. SALUTATION	'Dear Sir/Ma'am, Thank you for the opportunity. We are pleased to...'
5. BOQ TABLE	S.No, Description, Unit, Qty, Unit Rate (₹), Total (₹)
6. COST SUMMARY	Material + Labour + Transport + GST + Grand Total
7. SCOPE OF WORK	Specifically what you WILL do
8. EXCLUSIONS	Specifically what you will NOT do (critical!)
9. TERMS & CONDITIONS	Delivery, Payment, Force Majeure, GST, Validity
10. CLOSING & SIGNATURE	Look forward to reply. Your Name, Designation, Contact

SAMPLE BOQ (Anonymous Industrial Duct Project)

Description	Unit	Qty	Rate	Total
MS Duct 3mm dia 520mm	Mtr	10	4,148	41,475
MS Duct 3mm dia 360mm	Mtr	19	3,392	64,439
MS Duct 3mm dia 270mm	Mtr	5	3,098	15,488
MS Bend 90° dia 360mm	Nos	1	4,200	4,200
MS Reducer 360x520mm	Nos	1	3,255	3,255
MS Hopper 800x1000 H-900	Nos	7	13,125	91,875
MS Flange dia 520mm	Nos	12	751	9,009
Nut-bolt set	Kg	25	121	3,019
Asbestos rope 3mm	Roll	8	788	6,300
MATERIAL TOTAL				**2,39,060**
Erection Labour	**Lot**	**1**	**65,750**	**65,750**
GST @ 18%				**55,036**
GRAND TOTAL				**3,59,846**

Exclusions clause is as important as scope! Always list what you will NOT do: civil work, electrical, demolition, night shifts, extra drawings, modifications, etc.

ACCUMEN TECHNO MARKETING SOLUTION

Your Mentor in Technical Sales, Industrial Projects & Techno-Commercial Excellence

info.accumentechno@gmail.com
